Wolverines Lose Homecoming Grid Game To Colusa 11

In a hard-fought, well-played game, the Tahoe Truckee Wolverines held the Colusa High School Redskins to a close score until the final quarter and then lost 21 to 12 in the Homecoming contest here last Saturday.

Colusa scored the first touchdown as the game started when Tanner carried for four yards and the conversion was completed.

In the second quarter, the Wolverines snapped back and scored twice, the first on a 64-yard pass play from Schwartz to John Besio and the second on a one-yard run by Dick Nielsen.

The half ended with the Wolverines leading 12 to 7 and the third quarter was scoreless and both defensive teams played well. In the final quarter, Colusa showed renewed strength and Tanner on a 20-yard run put the Redskins ahead and was followed by Ranceleas who spurted across on a 17-yard run to cinch the game.

The Junior Wolverines upheld their end by trouncing the valley JV squad 20 to 6 in the preliminary contest.

Tomorrow (Friday) the Wolverines travel to Del Oro for a game under the lights, the preliminary starting at 6 p.m.

The games last Saturday marked the final contest of the season scheduled for the home field.

Supervisors Delay Action On License Tax For County

After hearing discussions pro and con relative to the proposed business license tax for the unincorporated areas of Nevada County, the board of supervisors Monday delayed action on the issue, but indications are that the ordinance providing the tax will be passed at a future meeting.

A few changes in the proposed ordinance were requested for it to meet some of the objections voiced. There was no one from the Truckee Donner area at the meeting with the exception of Supervisor H. G. Loehr who has declared his opposition to the measure.

The ordinance will impose a tax on all businesses operating within the unincorporated portions of the county and while it is designed to protect merchants from itinerant peddlers, this may prove virtually impossible as costs may be prohibitive. All the money collected from the tax would go into the general fund.

Rates For Water Service At Donner Will Be Boosted

The Public Utilities commission of California has authorized an increase in water rates charged by the Donner Lake Public Utility Company for the 521 customers served in the area.

The present annual flat rate charge may be boosted from $60 to $81 annually, under the order issued by the commission last week. The company had sought a $30 annual increase to $90 for the flat rate service and an annual mimimum charge of $90 for metered service.

In the latter category, the commission approved an increase to an $81 minimum for a 1-inch meter, $101 for an 1½-inch and $123 for a 2-inch meter. The annual minimum charge will entitle the customer to the quantity of water each month which one-twelfth of the annual minimum charge will purchase at the monthly quantity rate.

The flat rate charge, applicable in the area the company serves, will be $81 for a single-family residence, including the premises, with the same charge for each hotel or apartment, including the first room or unit. An additional $41 will be charged for each additional room or unit.

The company was instructed to file its new rate schedule within 90 days with the commission.

The order issued last week culminates a public hearing held May 27 and 28 this year at Donner Lake Lodge before Examiner Gillanders.

District Files Suit Against P. G. & E. To Obtain Power

Through their attorney, Martin McDonough of Sacramento, the Truckee Public Utility District has filed an action against the Pacific Gas & Electric Company seeking to force the company to supply electric power to a point near Donner Summit for transmission to the Truckee area.

The complaint, filed with the Federal Power Commission, charges that the PG&E has refused to make power available to the district from the Central Valley Project, although it is charged other similar areas are thus served.

Currently, the utility district buys all its electric energy from Sierra Pacific Power Company which is supplied in part by the PG&E from lines extending to Donner. It is charged that a substantial reduction in wholesale rates could be established if the PG&E would provide power directly to the district.

CHARGE DISCRIMINATION

The complaint says that in event the Sierra Pacific declined to transport the power to the utility district over its lines from the summit, the district would construct its own line for the purpose.

It is charged that by not furnishing power to the summit for the district, the company is violating provisions of the Transmission and Exchange Contract. This the complaint alleges, is "arbitrary, and capricious and discriminates against complaintant improperly and unlawfully in favor of other municipalities of the State of Cali-

TWIN PEAKS UNITES WITH ALPINE MEADOW

ALPINE MEADOWS—On October 4, 1965, Byron L. Nishkian, president of Alpine Meadows of Tahoe, Inc., announced the absorption of the Twin Peaks Ski are by Alpine Meadows. This addition quadruples the present ski area of Alpine Meadows and adds the potential of another dozen chair lifts to the complex.

The land development in that area will continue to be operated on fee land by other private interests and will be known as the Twin Peaks Golf and Ski Club. All skiing in the new annex will be under the complete control of Alpine Meadows.

Chappie Hits At Brown Policy On Tahoe's Pollution

Assemblyman Gene Chappie, Cool, accused Governor Brown of "dragging his feet" on the matter of pollution of Lake Tahoe.

"Earlier this year," Chappie said, "great strides had been taken by the division of environmental sanitation in arriving at some solution with Nevada on the handling of sewage in the beautiful Lake Tahoe area."

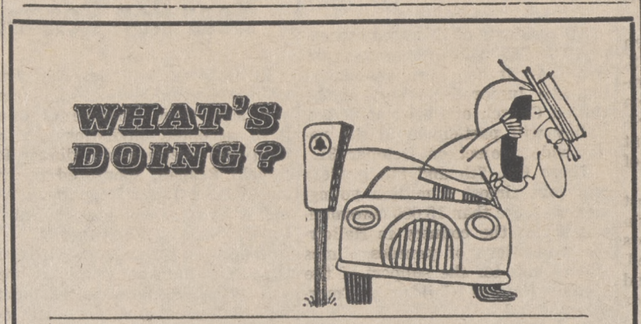
At that time, Chappie stated, a program had been worked out between the South Tahoe Public Utility District, the Douglas County Sewer Improvement District, and the newly formed Round Hill General Improvement District.

"However," Chappie added, "there arose out of this program some question as to the legality of spending California money in another state and the lack of assurances of permanent availability of facilities to California. It was decided back in May of 1965 that alternatives could be implemented but it would take a meeting between the governors of the two states and the officials of the various districts. This meeting has never been held nor even suggested by Governor Brown.

"Even under immediate agreement, a workable program would take at least two years to construct in order to efficiently keep pollution from growing in the Lake Tahoe waters. Four months have passed since initial negotiations and programs were drawn up and the report on those negotiations was 'hidden' from those of us who have a keen interest in a rapid solution to this problem.

"I therefore call on the Governor to take immediate steps to contact the Governor of Nevada and put in motion necessary steps to negotiate the alternative programs offered by his own department."

Five sure signs your home electric wiring is out-of-date Sierra Pacific Power Company says are fuses that blow or circuits that trip frequently; dimming, blinking or annoying flickering of lights; television picture that wobbles and shrinks; appliances that take longer to heat; and air-conditioners that fail to do the job.



How do you string telephone wire under a customer's house when the space between ground and floor is only 18 inches? It was the customer's pet beagle to the rescue! After tying the wire to the dog's collar, the customer went to the other side of the house as the telephone man put Buster in the small opening. At the sound of "Here, Buster," the beagle, dragging the wire behind him, scooted through to his master—and the job was done!

Memories are made of this . . . electronic memories anyway. This brain cell provides "memory" for a new telephone switching system which someday will make it possible for you to set up conference calls yourself, use abbreviated numbers for calls you make often and to have your incoming calls transferred to another number. Improvement of your service is our chief concern. And improvement means change . . . in equipment and techniques. Every change is aimed at giving you better phone service at reasonable cost.

Back in 1955 in Americus, Georgia, the Bell Solar Battery began its first trial in actual service on a rural telephone line. Ten years later, the Solar Battery is used as a source of power on many of today's space satellites.

Long Distance calling in the Tahoe Truckee area has really become convenient and fast these days. Most places are only seconds away when you dial direct . . . a far cry from the time when a call from coast to coast had to be relayed from operator to operator and took several minutes. With today's Direct Distance Dialing, calls are completed in seconds. You'll find a list of Area Codes and other Long Distance calling tips in the front of your phone book.

Safety, Beauty Combine In New Buick Line Now On Display At Snyder Buick

Snyder Buick in Truckee last week was displaying the 1966 line-up of new Buick models—highlighted by the new Wildcat Gran Sport option, new body styling for Specials and Skylarks and for the first time a Skylark four-door hardtop sedan.

The emphasis in 1966 has been placed on safety, styling and performance and in announcing the new Buicks, Robert L. Kessler, general manager of Buick and vice president of General Motors, cited a number of safety features which will be standard equipment on all 1966 cars.

"We believe the good performance and maximum safety are two automotive characteristics that go together," Kessler said, "and we have emphasized both in our 1966 line."

Safety items that will be standard equipment on all Buicks include padded instrument panels, outside rear view mirrors, windshield washer and dual speed wipers, padded sun-visors, back-up lights, shatter proof inside rear view mirrors, brush-finish windshield wiper arms for reduction of glare and both front and rear seat belts.

Nearly all of these items were available either as optional or stand ard equipment in 1965.

The 1966 models feature new body styling and new power plants.

Throughout the entire line riding comfort and road noise have been reduced by such refinements as revised frames, new rubber bushings, new body mountings, new spring rates and shock valving.

Transmission refinements have been made for smoother operation.

Frames, axles, suspension systems and other factors controlling the ride and handling qualities have been improved.

Buick's Gran Sport optiions have been expanded with the addition of two Wildcat Gran Sport models, a two-door hardtop and convertible. Three Skylark Gran Sports and the Riviera Gran Sport complete this group of Buicks.

The 1966 Riviera, featuring an all new body and chassis was introduced earliier this month by Buick.

With the exception of the Riviera, body sizes in all other Buicks remain the same in 1966. Wheelbases ranging from 115 inches in the Special to 126 inches in the Wildcat and Electra.

Throughout the line, Buick's distinguishing feature in 1966 is a lower and wider look which has been achieved through reshaped grilles and in contours of the body sheet metal.

Specials and Skylarks have entirely new bodies, and introduce a new style in roof treatment for two-door coupes which is a unique fast back roof with a recssed back window. Four door models also have a new top roof line.

Such eye appealing touches as ventports, body moldings, emblems, name plates and wheel discs have been designed to blend into the new body styling.

Buick's famous V-6 engine which has improved performance with the use of a two-barrel carburator, is the standard plant on Specials and Skylark models.

A 300 cubic inch V-8 also is available on these models.

A new 340 cubic inch engine has been developed for the 1966 LeSabre and Sports Wagon models. This new power plant, with a 10.25 to 1 compression ratio, is available as an option on Specials and Skylarks.

The Special-Skylark series chassis has been revived with changes in the frame, front suspension and ride calibration that provide a quieter, more controlled ride with better stability. The rear tread has been increased to 59 inches.

In Buick's regular lineup—LeSabres, Wildcats and Electra 225—a new appearance has been affected through front, side and rear styling treatment.

Individual grilles, mouldings and other ornamentation features give each of the three series a distinctive appearance.

Wildcat and Electra 225 models are powered with Buick's 401 cubic inch V-8.

A performance option offered in the LeSabre "400" features the 340 cubic inch V-8 engine with a four barrel carburator and three-speed Super Turbine transmissioin.

The Wildcat Gran Sport is powered by a 425 cubic inch engine with single four-barrel carburator, chrome plated air cleaner, aluminum rocker arm covers, dual exhaust, heavy duty suspension, positive traction axle and "Wildcat Gran Sport" markings.

The three Skylark Gran Sport models are a two-door coupe, two-door hardtop sport coupe and a convertible. These three top performers will be powered by a 400 cubic inch V-8 engine.

Extensive tuning and ride calibration work on the 1966 line has achieved even smoother riding qualitiies.

Mary Hickman Trio At Nevada Lodge

CRYSTAL BAY — A trio that specializes in the old favorites and a quintet that features comedy plus the best of the current hit tunes shares the Topaz Room spotlight at North Lake Tahoe's largest year-round resort hotel-casino, Nevada Lodge.

Long known as one of the most popular groups in the RenoTahoe area, the Mary Hickman Trio brings a taste of nostalgia to the Topaz Room stage with an array of request tunes and yesteryear's hits. With leader Mary Hickman on bass, Frank Delia on accordion and V. J. Bourgious on drums, the group creates a mellow minstrel mood reminiscent of the post World War II era.

By the same token, the big, fast upbeat Joe Sante quintet with Irene Keller spreads a total of eight instruments around the four men and a girl comprising this fun-aggregation. Joe Sante, one of the nation's leading sax players heads up the group that features lovely Irene Keller. Sante, long recognized as one of the top lounge stars on the West Coast, plays two saxophones at one time, doubles on alto and tenor clarinet, bass, soprano sax and trumpet. Need we say more? Such versatility can only be seen to be believed.

Lovely Irene Keller sings in a low husky voice, and does the novelty and comedy acts with old-pro Joe Sante.

Reed Gilchrist, Richard De Genero and Phil Alexander round out this outstanding musical quintet.

The Mary Hickman Trio appears on the Nevada Lodge's Topaz Room stage through November 8. The Joe Sante quintet arrives on Tuesday, October 26, and will share the Topaz Room stage honors through November 14.

In Placer County during the first 20 days this year 517 deer have been reported killed and last year there were 628 for the first 20 days. Sierra County showed a drop from 702 in 1964 to 418 for this year.

BICYCLE CAMPAIGN IS STARTED IN WEST

An extensive bicycle safety campaign with the theme "Best Rider in the West" today had the cooperation and support of the California Highway Patrol.

Commissioner Bradford M. Crittenden urged citizens to support the program which was launched to coincide with the fall opening of schools from the Oregon to the Mexican borders.

The bicycle safety campaign is an excellent opportunity for youngsters throughout the state to learn the value of developing good bicycle safety habits, Commissioner Crittenden stated.

"In a very few years today's young bike riders will be adult automobile drivers. It is vitally important that these children be encouraged to develop responsible attitudes toward safety."

The "Best Rider in the West" campaign is being conducted by the Independent Insurance Agents Association of California and the National Automobile Club, with cooperation of the patrol and local organizations.

50 Local Students Will Take Tests

More than 50 ninth and tenth grade Tahoe Truckee High School students will take the three-hour National Educational Development Tests Tuesday, November 3, according to James Brehler, vice principal.

The NEDT battery," he said, "is a series of tests in English, social studies, mathematics, natural sciences and word usage, which have been designed to measure each student's ability to apply basic learning skills rather than his ability to memorize particular facts of specific subject matter.

"They have been used in Tahoe Truckee since 1960 as a help to students, parents and teachers in identifying strength and weaknesses in each student's educational development and in making a realistic appraisal of his educational and vocational objectives," Brehler said.

"One of the most interesting aspects of this program," Brehler said, "is that students who do exceptionally well on the test battery are singled out for formal recognition. Each student who scores in the top ten per cent nationally is awarded a special certificate of merit signifying his high achievement. These certificates serve to stimulate a respect of academic excellence among student body."

Decency Petition For Placer County

AUBURN—Placer County residents have the opportunity to join in a state-wide move to adopt their own laws to "strike hard at criminal aspects of sexual activity", Supervisor William S. Briner local chairman of the decency amendment committee of the County Supervisors Association of California, announced today.

A "Declaration of Decency" amendment to allow local governments to adopt regulations to combat the "mushrooming growth of sexual crimes" is now being circulated in the county, Briner asid.

"Decency is the foundation of our way of life — the foundation of good government to protect our citizens."

"However, state pre-emption of certain laws regarding sexual activity is chipping away this foundation," Briner declared.

"A trend toward more crimes against women and children threatens our very way of life", the supervisor continued.

According to Briner the decency amendment being proposed by the state-wide County Supervisors Association of California headed by Los Angeles County Supervisor Warren M. Dorn, chairman of the law enforcement committee and the "California for Decency" has been supported by "numerous organizations and deserves the maximum support of the people it is designed to protect."

"I urge all Placer County residents of voting age to join in this 'Declaration of Decency' — an excellent insurance policy against the increasing crime rate".

Dorn and his committee promised that if the legislature failed to enact stronger laws on sexual crimes, they would take the matter directly to the people. The state body on three separate occasions neglected to do so. However, numerous individual state senators and assemblymen have endorsed the decency amendment.

We are once more faced with a crucial decision affecting the lives of all of us who live here, and many who do not.

At issue is the completion of the new wing.

We have the choice of prompt completion at minimum cost through bond sale or delayed completion over a period of at least five years with consequent increased cost.

But we desperately need the new hospital facilities NOW.

Therefore, we urge you to contact any or all of us, privately or at the various meetings to be held between now and November 23, when the next bond election will be held. We want to answer your questions, and resolve your doubts, if any, concerning the necessity for going ahead as rapidly as possible with this vital project.

We reaffirm our unanimous support for early completion of the total expansion program as planned. We believe that for you and your families, we can do with no less.

fornia for which transmission and deliverey of electric power and energy is made by Pacific pursuant to the Transmission and Exchange Contract."

"Such refusal by Pacific is contrary to the provisions of Section 205 of the Federal Power Act since it is not just or reasonable, and it is therefore unlawful," the complaint charges.

"By its refusal, Pacific makes or grants an undue preference or advantage to other municipalities of the State of California which are able to purchase electric power and energy from the Bureau at the R2F2 rate and to have it delivered to them by Pacific pursuant to the Transmission and Exchange Contract; and Pacific subjects complaintant to undue prejudice and disadvantage."

BUILD OWN LINES?
The complaint continues: "If the Commission orders Pacific to transmit and deliver electric power and energy to complaintant at the end of Pacific's lines, at or near Donner Pass at the Summit of the Sierra Nevada Mountains, complaintant will request Sierra to transmit and deliver such power to it from Pacific's lines over the existing transmission lines of Sierra. If Sierra shall refuse to transmit and deliver such electric power and energy for reasonable compensation, complaintant will construct its own transmissioin line from the end of Pacific's line at or near Donner Pass to complaintant's service area."

Documents, maps, rates etc., accompany the complaint which was filed October 5.
